The perfect sampler team: Stationary Liquistation CSF48 and portable Liquiport 2010 CSP44 and their sensors

Sampling the world's water safely

The new Liquistation CSF48 and Liquiport 2010 CSP44 revolutionize the world of sampling. They do not only comply with worldwide standards and legislation on water sampling, but provide unique flexibility to suit any kind of water application. They are also based on the new Liquiline-Memosens platform featuring the same ease of use and maintenance as all Liquiline devices. What is even more remarkable is that they are the only samplers that can be easily upgraded to a complete measuring station for six different parameters.

Your benefits

- One sampler for taking samples and measuring various parameters at the same time
- Guarantees safe sampling compliant with international legislation
- Fit for all kinds of applications and sampling locations thanks to modular hardware and flexible software
- Secures your process by a clear menu guidance via navigator and a common operation concept
- Offers easy and safe sample handling by separated bottle trays and fail-safe temperature control
- Reduces your maintenance costs through easy disassembly and cleaning of components
