

# From Sensor to Enterprise S&E

## CONTROL MICROSYSTEMS

SCADA products ... for the distance

- Enhanced Integration**
- Integrated suite of SCADA products and solutions
  - Simplified connectivity and configuration
  - Comprehensive remote management diagnostics and data collection

### Sensors

- Quick, easy, cost-effective wireless instrumentation
- Class 1 Div 1, IECEx, and ATEX certified
- Pre-defined templates in host simplify deployment

### Controllers

- DNP3, IEC 60870-5, and Modbus protocol support
- Relay Ladder Logic, IEC 61131-3, C/C++ programmable
- Remote configuration and application download from host. Time-stamped data maps directly to host historian

### Radios

- Reliable wireless communication
- Serial and Ethernet radios: stand alone or integrated into controller
- Full radio network diagnostics and alarming through the host

### SCADA Host

- Built-in historian, alarm redirection, reporting, and trending
- Integrated web server and live redundancy
- OPC, OLE Automation, ODBC/SQL, full suite of protocol drivers
